

Clear 10mm tempered glass, clear 10mm toughened building glass factory in China

Tempered glass is one of two kinds of safety glass regularly used in applications in which standard glass could pose a potential danger.(another [safety glass is laminated glass](#)).Tempered glass is four to five times stronger than standard glass and does not break into sharp shards when it fails.

Safety 10mm toughened glass is made by heating 10mm clear float glass.It is manufactured through a process of extreme heating and rapid cooling, making it harder than normal glass. It results in the outer surface under powerful compressive stress and the interior with severe tensile stress. In consequence, the impact applied to the glass will be overcome by the compressive stress on the surfaces to assure safety of use. It is ideal for areas with high wind loads and areas where human contacts are an important consideration.

10mm clear Tempered glass characteristics:

1. Strictly meet with building codes and safety requirements.
2. Strong enough to withstand high levels of thermal stress.
3. 4-5 times stronger than annealed glass of the same thickness.
4. Once breakage occurs, the glass disintegrates into small cubical fragments, which are relatively harmless to human body.
5. Sizes are produced as per customer request. once tempered, it can not be cut down.All work done must be done before tempering.
6. Can be printed with special logo and patterns with [ceramic frit silk screening printing](#).
7. Accept custom design,all kinds of shape,edge process and cutout.

10mm clear toughened glass specification:

Size: Maximum 3000*8000mm, Minimum 150*300mm.

Thickness: 3mm 4mm 5mm 6mm 8mm 10mm 12mm 15mm 19mm.

Color: clear, ultra clear, green, blue, gray, bronze, etc.

Processing: All the processing like beveling, cutting, drilling, etc. must be done before tempering.

Where to used 10mm clear tempered glass?

- 1.Curtain wall.
- 2.Office partitions.
- 3.Sliding doors.

4. [Shower door glass, bathroom partition.](#)
5. Balustrades, fence, canopy, handrail.
6. Shop display windows, showcases, display shelves.
7. Exhibition hall.
8. Furniture, table-top.
9. Shopfronts in offices, houses, shop.
10. many other applications.

10mm Tempered glass quality:

1. Meet standards ISO,CCC,CE,SGS, ANSI Z97.1, AS/NZS 2208 certification.
2. High strength and pure clean surface. Select 40% of high quality clear glass for tempering.
3. Superior work on edge treatment, cutout, drilling holes.
4. Strong plywood board crate package.
