6mm online coated reflective glass

6mm online coated reflective glass is a type of glass that is coated with a thin layer of metal or metal oxide. This coating gives the glass a reflective surface that can help to reduce heat gain and glare. The coating is applied to one side of the glass, and the other side remains clear. This type of glass is commonly used in commercial buildings and homes to provide energy efficiency and comfort. The coating is applied to one side of the glass, and the other side remains clear. This type of glass is commonly used in commercial buildings and homes to provide energy efficiency and comfort. The coating is applied to one side of the glass, and the other side remains clear. This type of glass is commonly used in commercial buildings and homes to provide energy efficiency and comfort.
