

China 8mm Low E-12A-10mm Clear Full Tempered Insulated Double Glazing Glass Factory

[Kunxing Glass](#) produce a lot Low E Insulation glass. The glass units are hermetically sealed combinations of a piece of 8mm low e glass and a piece of 10mm clear glass head separated by dry dry airspace. Low e Insulated glass improves thermal performance, solar energy saving, significant reduction of heating and air conditioning costs. Low e IGU also reduce indoor condensation in cold climates.

About 8mm Low e glass + 12A + 10mm clear tempered glass

Glass insulation is fabricated according to project specifications, can be constructed using a large variety of glass products to achieve the desired aesthetics, meet design standards, safety codes and / or to improve solar control and thermal performance. Glass options include clear float glass, low iron float glass, low e glass, tinted float glass, reflective glass, [silk-screen printed glass](#), hot twisted glass, laminated glass, decorative glass and wired glass. The glass of IGU can be annealed, heat-strengthened, tempered or laminated.

8mm + 12A + 10mm clear head and Low e double glazing glass Specifications:

Min Size: 300mm * 300mm

Max size: 3300mm * 6000mm

Ships: 12mm-60mm

Aluminum Spacer: 6mm 9mm 12mm 16mm (1/4 ", 11/32", 1/2 ", 5/8")

Spacer Fill: Dry Air, noble gas such as Argon, etc.

Low e insulated glass Application

1. Fixed and Operable windows
2. [Glass Walls / Facades](#)
3. Sloped / Overhead Glazing and skylights

4. Non-vision locations
