

10mm clear curved tempered glass balustrade, 10mm safety clear curved toughened glass factory

10mm clear curved tempered glass is shaped by dies controlled by computer, rapidly and uniformly cooled immediately after it is heated to the designed shape. This kind of glass has all the good performance of 10mm flat tempered glass, but has a higher intensity for the wind pressure and bending than the flat tempered glass.

Advantages of 10mm clear curved tempered glass used for balustrade:

1. Safety performance: 10mm curved tempered glass balustrade panels will appearance hurt-less obtuse angles when breakage.
2. Strength performance: 4-5 times more than ordinary 10mm clear float glass
3. Heat stability performance: Three times more than ordinary glass, could bear the temperature change about 200°C.
4. Enjoying a high architectural grade design, greater aesthetics and wide view scenery.
5. Easy to clean dirty and replace when necessary.

Specification of 10mm safety clear curved tempered railing glass:

Size: Max size is 5600mm*2400mm, Mini size is 400mm*600mm, other custom design size can made by drawing.

Radius: 10mm clear curves tempered glass mini radius is 1200mm, and can unlimited max radius.

Please note: Considering the characteristics of 10mm clear curved tempered glass fence panels, glass size, edge process, drill holes and others should be confirmed before making production. Once glass size is cut out, glass railing can not be made mechanical treatment any more, otherwise it will be broken.

Related recommendation:

If 10mm clear curved tempered glass is not the best choice for your balustrade, our company has other more options for you.
