

Glass factory supplier various functional requirements 5mm 6mm 8mm 10mm windows wall door safety toughened glass

As is well known, glass has the advantages of high light transmittance, low cost, and diversified selection. Anti-theft, energy saving and decorative features.

Usage: transparent float glass, ultra-clear low-iron glass, colored float glass, solar reflective glass, tempered glass, wine glass, safety glass Low E, laminated glass, [curved glass](#) can be the kind of window glass, acid-etched glass, insulation Glass and [reflective glass](#), as well as new technology glass PDLC film such as smart glass.

The high transparency of the transparent float glass ensures that sufficient light can pass through Windows.

Patterned glass and frosted glass allow for high light transmission, but protect the privacy of the translucent appearance.

Stained glass and reflective glass facilitate solar control and energy savings.

Insulating glass - heat and sound proof.

The highest safety glass for tempered glass or laminated glass, the human body is harmless and has certain anti-theft function.

The PDLC film smart glass changes the control voltage between the transparent and opaque functions, and the smart laminated glass allows for smart windows.
