

Wholesale price curved safety [double glazing glass](#) insulating glass manufacturer

Curved tempered insulating glass

8mm + 12A + 8mm curved tempered safety insulating glass, 28mm curved sound-insulating glass, 28mm curved heat-resistant double-layer glass, 28mm energy-saving insulating glass, 28mm [curved double-glazed unit](#), separated by 12 pieces of 8mm tempered glass 12A aluminum gasket Sealed with the edge double. The high quality 8 + 12A + 8mm double glazed insulating glass provides greater insulation value comfort, energy efficiency and climate control economy.

Insulated curved glass panel features

1. Original glass composition, 8mm transparent curved glass, 8mm green curved glass, 8mm gray curved glass, 8mm colored reflective curved glass, 8mm ultra-transparent [curved glass](#), 8mm tempered glass, 4 + 4mm curved laminated glass. A variety of glass can be combined to meet your requirements.
2. Glass size: The maximum size is 3300 * 8000mm, which can be customized.
3. Aluminum gasket: In addition to 8mm + 12A + 8mm, there are 8mm + 9A + 8mm insulated curved glass or 8mm + 16A + 8mm insulated curved glass or 8mm + 20A + 8mm insulated curved glass.

Advantages of curved reflective insulating glass

1. Soundproof: The 12A air layer is full of dry gas, and the frame is filled with desiccant to ensure sound insulation.
2. Waterproof function, transparent reflective glass or color reflective glass or low-reflection reflective glass, effectively control solar radiation, making it a reflective hollow glass, expanding the maximum energy efficiency.
3. Curved-shaped insulating glass creates an aesthetic scene for your building.
4. Energy-saving glass, saving summer air-conditioning costs, saving winter heating costs, and having good

insulation and energy-saving effects.

Products name 产品名称	Curved Tempered glass 弯钢化玻璃
Thickness 厚度	4-19mm
Maximum size 最大尺寸	2440mmX8000mm
Minimum Radius Range 最小弯钢半径	5-6mm R>=450mm; 8mm-10mm R>=650mm; 12mm-19mm R>=1200
Features 特性	It has same safety and ability of anti-impact with flat tempered glass, but has a higher intensity for the wind pressure and bending than the flat tempered glass.
Certification 认证资质	CCC, ISO, CE, AS/NZS2208

Application of curved insulating glass

8mm + 12A + 8mm [curved safety insulation glass](#) for curtain walls, office buildings, many public places, etc.

In addition to 8mm + 12A + 8mm curved insulating glass, we can produce 8mm + 12A + 8mm flat insulating glass, transparent reflective hollow glass of different colors, color reflective double glazing unit, low tempered insulating glass and so on.

High quality insulating glass not only provides you with a comfortable life, but also helps you save more costs.

[Kunxing Glass](#) promises all our customers, we always keep producing high quality insulating glass, about our insulating glass

Regarding the raw glass, our QC staff inspect each product one by one to ensure perfect quality, no bubbles, no scratches, high precision flatness.

Regarding the seal, we always double seal to avoid moisture entering the glass.
