

## Window

Windows, 3D rendering, architectural rendering, glass, modern architecture, skyscraper, blue sky.

Windows are essential for modern architecture, providing natural light and ventilation. They are also a key component of energy-efficient buildings, with IGUs (Insulated Glass Units) offering superior thermal performance. The use of glass in skyscrapers is a testament to the advancement of window technology, ensuring that buildings are not only aesthetically pleasing but also functional and sustainable. The image shows a curved glass facade, a common feature in contemporary architectural designs, highlighting the elegance and durability of modern window solutions.
