

4mm-12A-4mm [IGU 4mm-12A-4mm](#)

IGU. 4mm-12A-4mm IGU is a high-quality glass unit that provides excellent insulation and protection. It is ideal for use in windows, doors, and skylights. The IGU is made of two 4mm glass panes with a 12mm air gap. This configuration provides excellent thermal insulation, reducing energy costs and improving indoor comfort. The IGU is also resistant to UV radiation, protecting interior surfaces from fading and discoloration. For more information, visit [IGU](#) in [China](#) or contact us directly.

4mm + 12A + 4mm IGU is a high-quality glass unit that provides excellent insulation and protection.
