

## China 21.52mm curved tempered super strong SGP laminated glass na presyo, 10104 bent laminated safety glass factory

### Panimula

21.52mm curved laminated glass, maaaring 21.52mm curved tempered laminated glass, maaari ding maging 21.52mm hot bending safety laminated glass, ito ay gawa sa dalawang piraso [10mm curved tempered glass](#) o dalawang pirasong 10mm mainit na baluktot na salamin na may 1.52mm PVB o SGP interlayer. Pinagsasama nito ang parehong mga tampok ng laminated glass at hubog na salamin, na ginagawa itong napakapopular sa panahon ng mga arkitekto at taga-disenyo.

**Pagkakaiba** sa pagitan ng 21.52mm [curved tempered laminated glass](#) s at 21.52mm hot bending safety laminated glass

- Parehong ang curved laminated glass at hot bent laminated glass ay safety glass, maaaring gamitin kahit saan upang matiyak ang kaligtasan ng tao, at magdagdag ng higit na aesthetic sense sa mga gusali.

- Ang curved laminated glass ay may curved safety tempered glass, na humigit-kumulang 5 beses na mas malakas kaysa sa normal na annealed glass, upang makayanan nito ang mas malakas na pag-atake. Ngunit ang mainit na nakabaluktot na nakalamina na salamin ay may mainit na nakabaluktot na salamin, na may parehong mga tampok ng normal na salamin na float, kaya sa tampok na ito, ang mga hubog na nakalamina na salamin ay mas ligtas kaysa sa mainit na liko na nakalamina na salamin.

- Ang curved laminated glass ay nakakagawa lamang ng isang radius, at may limitadong radius, ngunit ang mainit na bending laminated glass ay maaaring gumawa ng multi-radius, at maaaring gumawa ng anumang hugis, maaaring matugunan ang anumang customized na disenyo, para sa tampok na ito, ang mainit na bend laminated glass ay higit pa nagagawa kaysa sa curved laminated glass.

### Pagtutukoy

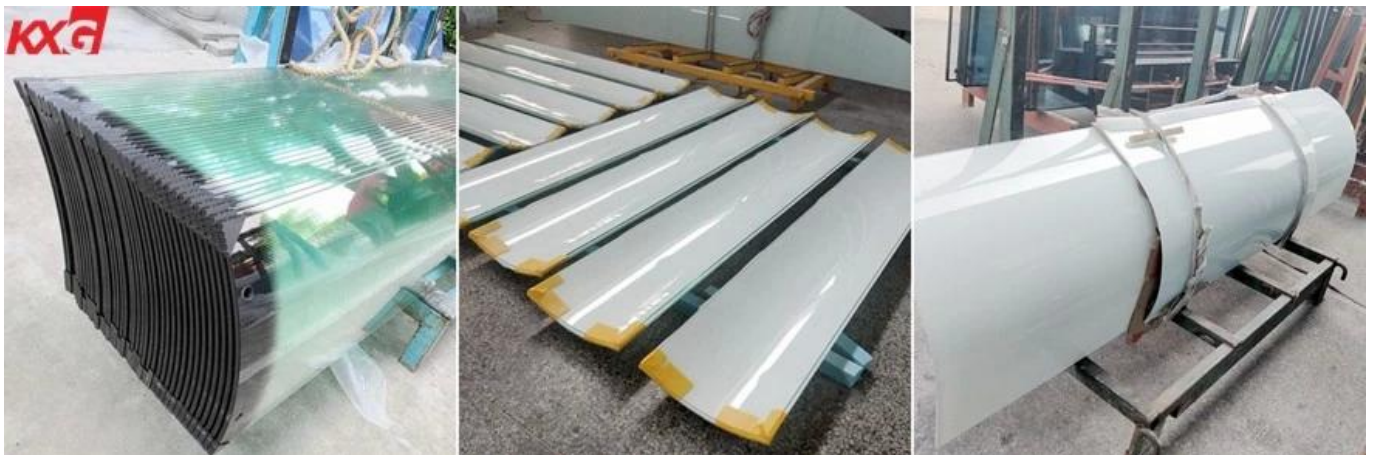

- Komposisyon: 10mm curved toughened safety glass 1.52mm PVB / SGP 10mm curved toughened safety glass, 10mm bending float glass 1.52mm PVB / SGP 10mm bent annealed glass

- Sukat: Max: 6000mm\*3000mm, Mini: 300mm\*300mm, anumang customized na laki ay maaaring gawin

- Pagproseso: Pinakintab na mga gilid, drill hole, cut notches, sandblasting, screen printing, atbp.

- Uri: 21.52mm clear curved toughened laminated glass, 21.52mm low iron curved safety laminated glass, 21.52mm etched curved tempered laminated glass, 21.52mm color bent laminated safety glass, 21.52mm silkscreen heat-strengthened laminated curved 52mm laminated glass, 21.52mm cylindrical curved laminated glass, atbp.

- Iba pa: Maliban sa 21.52mm, gumagawa din kami ng 8.76mm, 11.14mm, 13.52mm, 17.52mm curved safety laminated glass

## Aplikasyon

10104 security laminated **curved glass** ay malawakang ginagamit bilang curved safety elevator glass, curved skylight glass, curved exterior wall glass, curved office partition wall glass, curved handrail glass, curved stair railing glass, curved corridor glass, bent aquarium glass, atbp.
