

12mm toughened glass balustrade factory price-4+4mm laminated glass balustrade for balcony

Toughened glass [balustrade](#) is made of clear toughened laminated glass. Tempered glass has been processed intense heating and rapid cooling in a controlled process. Tempered glass will not break into sharp shards, but will instead break into small pieces or fragments.

Kunxing Glass Co.Ltd supply toughened glass balustrade, we supply high quality toughened and laminated glass for strong, durable glass safety features for a host of applications, including: banisters, balustrades, canopies, balconies, glass handrails.

Why to use laminated tempered glass for balustrade?

- 1 Safety. Because of tempered glass has been processed intense heating (600-650°C), and rapid cooling in a controlled process. and will not cut or cause harm as easily as regular glass.
- 2 Aesthetics
- 3 Sound proof [laminated glass](#) is made of PVB or SGP panels can block the sound transmission, and reduce the noise.
