

China 6mm + 12A + 6mm double glazing factory

The [glass window](#) can be made of transparent float glass, colored float glass, reflective glass, patterned glass, acid-etched glass or laminated glass, and insulating glass. Flat glass windows and curved glass windows are commonly used in our houses, hotels, and office shopping malls.

6mm + 6mm 12A partition double glazing

It consists of two 6mm glass plates separated by a 12A aluminum partition and sealed together at the edges. The insulated space is filled with dry air or an inert gas such as argon or helium to slow heat exchange and reduce noise levels. It's not only the decorative glass for your windows, but also keeps the room warm during the winter and cool in the summer.

6mm + 12A + 6mm double glazing features

1. Size: up to 3000x9000mm
2. Glass thickness: 6mm + 6mm
3. Glass color: transparent, ultra clear, bronze, gray, blue, green
4. Glass type: Toughened , low radiation, coloring, reflective, ultra-transparent, screen printing, acid etching, pattern, etc.
5. Aluminum gasket: 6A, 9A, 16A, etc.

Advantages of double glazing of different glass types

Low e insulated glass window

The two glazings feature low e-protection and insulated argon between the glazing, blocking 94% of the sun's UV rays, helping to prevent fading damage to carpets, furniture and window treatments.

Colored insulated glass window

Helps block the sun and keep the room from direct sun protection. Let the sun shine in while obscuring your eyes and protecting your privacy.

Tempered insulated glass window

Strength and safety, usually broken into small square pieces rather than sharp pieces when broken.

Laminated insulated glass window

To provide additional protection and reduce external noise for increased safety and noise control.

Glass that can be supplied by Kunxing Glass

1. Tempered insulating glass: transparent tempered [insulating glass](#), colored tempered insulating glass, reflective tempered insulating glass, etc., can be customized according to your requirements.
2. Insulating glass: transparent insulating glass, colored insulating glass, reflective insulating glass, etc., can be customized according to your requirements.
3. Float glass: transparent float glass, colored float glass, reflective float glass, acid etched float glass, patterned float glass, etc.
4. Glass: transparent tempered glass, colored tempered glass, reflective tempered glass, acid etched tempered glass, etc., can be customized according to your requirements.
