

## CE certified Australia standard 6mm light blue sea blue tinted tempered glass window

### 6mm light blue tempered glass

6mm light blue tempered glass, also known as 6mm light blue [tempered glass](#), light blue tempered glass, processed with high quality 6mm light blue float glass. With grade A, high precision flatness, no bubbles, no scratches, high light transmission. It is a solar absorbing glass, safety decorative glass, very suitable for use as a laminated glass 6mm light blue and another glass panel, insulating glass 6mm blue and another glass panel. Widely used in windows, doors, curtain walls, table tops, railings, skylights, etc.

## Advantages of 6mm blue tempered glass panel

1. Safety: 6mm blue tempered glass panel, if damaged by external force, is especially small and harmless to the human body.
2. Stronger: 6mm blue tempered hardened glass, 4-5 times stronger than 6mm blue float glass.
3. Protect from UV rays and protect furniture from fading.
4. Reduce sun glare and heat transfer.
5. Solar control and energy saving glass.
6. Drilling, cutting, edge machining, all special processing needs to be done before tempering.

## 6mm Ford blue tempered hardened glass features
