

Building construction glass curtain wall heat reflective glass insulated glass architectural tempered solar control soft coating glass double glazing glass for facade

Heat Reflective insulated glass advantages:

1. High reflectivity for privacy and visual comfort.
2. Combinations of solar-control and light-transmission levels, as well as a variety of colors.
3. Can be heat-treated, laminated, bent, or otherwise processed.
4. Can be combined with other [KXG glass](#) product to deliver custom-tailored energy performance that meets specific regional needs

Heat reflective glass [Insulated glass](#) production specification:

Glass Max size: 2500mm*4000mm Glass Min size: 180mm*350mm

Glass sheet type: grey reflective glass, bronze reflective glass, green reflective glass, low-e coating glass, screen printing, acid etched, etc.

Glass Thickness(mm): 3mm-19mm

Argon or Air space thickness: 6A, 9A, 12A, 16A, etc.

Spacer Fill: Dry Air, noble gas like Argon, etc.

Glass color: clear, ultra clear, F-green, ford blue, gray, bronze, golden bronze, etc.

Packing: standard seaworthy wooden crates

Solar control soft coating double glazing glass applications

Hotel, hospital, shop mall, police station, outer [curtain wall](#), glass skylight, glass dome, hotel, shopping mall, gymnasium, museum, curtain wall, facade, windows, greenhouse, glass canopy, etc.
