

## China silk screen tempered glass manufacturer, 15 mm color silk screen printing

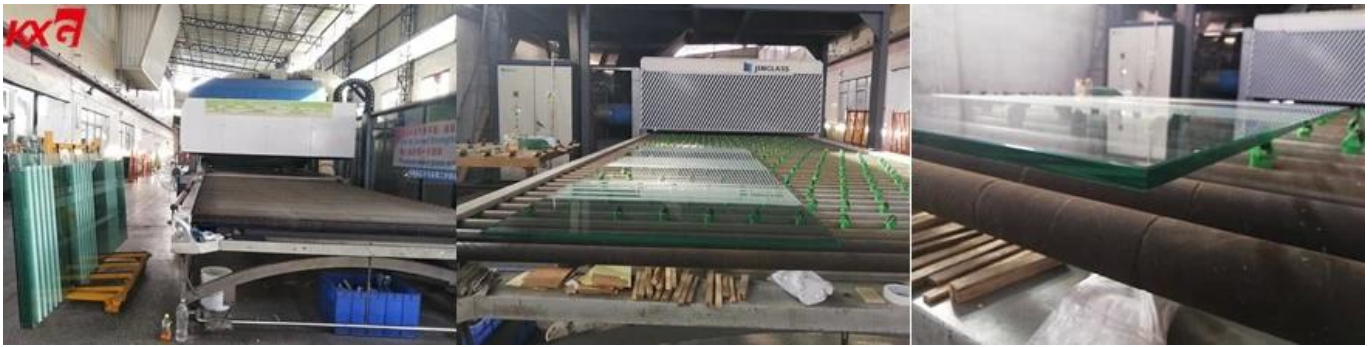

[Silk screen printing tempered glass](#) is a special kind of decorative glass made by printing a layer of ceramic ink on the surface of glass through the screen mesh for tempering or heat-strengthening process after. With the use of silk-screens we can print different images on glass, with opaque or translucent ceramic inks, with the desired design or RAL color. After the tempering process the inks are vitrified and the screen-printed images remain unaltered with time.

**15mm screen printing glass, It not only has the features of silk screen printing glass, but also keeps the same advantages from tempered glass.**

1. **Safety glass, security glass:** being hard to be broken in impact and becoming very small particle fragment with obtuse angle, tempered glass no injures to human body.
2. **Thermal stability:** 12mm printed tempered glass has better stability than 12mm color painted float glass.
3. **High strength:** 12mm silkscreen printing toughened glass has 4-5 times strength than 12mm color painted float glass.

4. **Any pattern you desire:** you can choose one color of your choice.
5. **Waterproof, resistant,** widely used for kitchen, furniture, wall decorative.
6. **Easy to clean and maintain.**
