

## **China glass supplier 663 annealed tempered clear laminated glass 13.14mm balcony balustrade railing**

[Laminated glass](#) is one of the strongest glass forms. Its viscosity is strong enough to be used in many areas where safety and reliability are critical. When the laminated glass is hit, it will crack in a mesh pattern. The two transparent float-annealed glass were bonded together by three layers of colorless PVB to form a transparent laminated glass. If the glass breaks or punctures, the PVB layer holds the glass together.

### **663 PVB transparent laminated glass specifications**

Combination: 6mm transparent glass + 1.14mmPVB + 6mm transparent glass

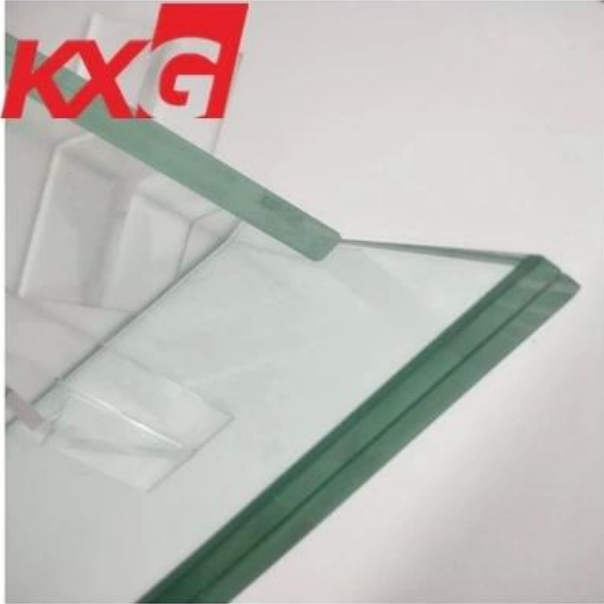

Thickness: 13.14 mm

Available glass type: 6mm transparent tempered glass, 6mm ultra-transparent low-iron tempered glass, 6mm tinted glass, 6mm reflective glass, etc.

Size: Maximum size: 3000 \* 13000mm

Special requirements: edge polishing, cutting, drilling, marking printing, etc.

Features: high security, energy saving, sound insulation, decoration, etc.

## Advantages of 13.14mm transparent PVB laminated glass

1. Laminated glass is durable, maintains color and strength for a long time, and saves the cost of replacing glass.
2. Laminated glass has a high noise reduction index and reduces noise.
3. Due to the PVB middle layer, the furniture that can be protected deteriorates and the picture fades.
4. The laminated glass structure remains intact under impact to prevent damage from severe weather and natural disasters.
5. The laminated glass PVB interlayer absorbs impact energy and resists penetration.

## [Kunxing Glass](#) has other laminated glass options

- 8.38mm color PVB laminated glass (441)
- 25.52mm safety tempered laminated glass (12124)
- 6.38mm milky white PVB laminated glass (331)
- 10.38mm blue colored float laminated glass (551)
- 17.52mm frosted tempered laminated glass (884)
- 553 F-green tempered laminated glass (11.14mm)
- 66.4 transparent curved tempered laminated glass (13.52mm)

## **Application**

13.14mm transparent PVB laminated glass is ideal for railing glass, swimming pool [guardrails](#), canopies, [skylights](#), roofs, doors, partition walls, etc.
