

China good quality Silk screen printed tempered glass professional factory

Silk screen printing glass

The procedure of silkscreen printing glass is printing the needed design on the glass surface with inorganic glaze which has high temperature resistance. After process of drying and agglomeration, the Silk screen pattern designs will be agglomerated permanently on the glass surface. For the similar process of tempered glass, silk screen printing glass has all the characteristics of toughened glass. Meanwhile, silk screen printed glass is a kind of safe anti acid and anti alkaline decoration material.

Except the silk screen printed glass, there are also other types glass, such as the frosted printing glass, [Digital printing glass](#).

Characteristics:

Coloured: extra clear, clear, bronze, gray, green, blue, black and so on.

With mirror base: extra-clear, clear and coloured.

Thickness: 5, 6, 8, 10, 12, 15, 19mm

Weight: 2.5kg/m² per mm thickness.

FEATURES

Available in different color and patterns as per design

Interior, exterior, dry and wet use.

Good quality, without irregularities.

Highly scratch and stain resistant.

Large-scale production capacity.

Easy transformation: cutting, beveling, curving, drilling, tempering and laminating.
