

China best quality lacquered glass wall factory

The lacquered glass wall, also known as the stained glass wall, the pedestal [glass wall](#), and the lacquered glass wall. It uses top quality transparent float glass or low iron float glass to permanently bond the paint to the glass by depositing a highly durable and durable paint on a flat, smooth surface and then carefully baking into a constant temperature oven. on. The lacquered glass has all the features of the original float glass, while also offering wonderful opaque and colorful decorative applications.

Lacquered glass wall features

- Waterproof and moisture resistant,
- Use lead-free safety paint, the human body is harmless and environmentally friendly,
- The painted surface is smooth and easy to clean,
- Provides wonderful translucent and colorful decorations.

The difference between lacquer glass and screen printing glass

- Both lacquered glass and mesh glass are decorative glass that can be used in any color and any pattern.
- The surface of the lacquered glass is easily scratched, but the surface of the woven glass is strong and difficult to scrape off.
Painted glass has all the functions of original float glass, screen printing glass has all the functions of tempered glass.
- Due to the durable surface, lacquered glass is most commonly used indoors, and screen-printed glass is most commonly used outdoors.
- Produce lacquered glass by depositing lacquer on glass and bake it into a furnace, producing [screen-printed glass](#) on glass by screen printing ceramic frit coating, then drying and heat treatment.
- The surface of the lacquered glass is smooth and flat, and the surface of the wire mesh glass is less contaminated by heat treatment.
