

China high quality solar control energy saving soundproof flat or curved reflective insulating glass factory

About Reflective insulated glass

Reflective insulated glass is made by reflective glass with other type glass to make the double glazing, so its with reflective glass and insulated glass function, which is solar control, energy saving ,soundproof,etc, so its popular to used on the glass window, curtain wall glass, facade glass, skylight glass,etc.

Characteristics energy saving insulated glass

1. Improve the thermal performance of glass when used in architectural applications.
2. Meets the special requirements for temperature control, sound control, light, solar control and security.
3. Avoid the light pollution and create a good life environment.
4. Control solar energy radiation effectively, block far infrared radiation, save expenses of air conditioners in summer, save heating expenses in winter, have good effect of heat preservation and energy saving.
5. Can be combination with patterned glass for increased aesthetics; coated, tinted, or low-E glass for thermal control.
