

Customized impact resistant safety laminated glass curtain wall facade from the world manufacturer Dongguan glass factory

As we walk down the street, we can see more and more buildings covering [glass walls](#) instead of traditional concrete walls, which can be of various types. Such as U-shaped channel glass, safety laminated glass, energy-saving insulating glass, as a professional architectural glass processing plant, we produce many different curtain wall safety laminated glass.

- Solar thermal control reflective impact-hardened laminated glass exterior wall, online hard-coated reflective laminated glass, energy-saving Low e laminated glass, and even custom offline low e laminated glass;
- High transparency transparent tempered laminated glass curtain wall and low iron ultra-transparent tempered laminated glass curtain wall;
- Decorative EVA, PVB, SGP, PET and other decorative safety laminated glass exterior walls;
- If better thermal performance is required, we can use laminated glass to make laminated insulating glass to save more air conditioning costs.

Laminated glass as curtain wall glass

- Different glass thermal efficiencies that contribute to the cost-effective heating or cooling of the building.
- The glass curtain wall is easier to clean when it is dirty and replaced when it is accidentally damaged.
- [Laminated glass](#) is a high-security glass that ensures that the glass does not fall and harm humans;
- The glass curtain wall allows natural light to penetrate deeper into the building, helping to save some light costs. The transparency of the glass also helps us to enjoy the outdoor landscape easily;

- A variety of glass colors and designs that help architects and designers make the building look better;

KXG quality and service

- The most reasonable price, based on the best quality, our strict financial control system ensures that our prices are lower than our competitors.
- High quality glass, ISO and CE certified, best raw materials, advanced production machines and skilled workers.
- Powerful export plywood packaging and safe loading to ensure glass safety during transportation, even accidental damage, we will compensate or replace the glass in the shortest time, no excuses.
- Provide one-stop professional service from glass design and selection to safe transportation arrangements, up to final after-sales service.
- Fast delivery times, our high productivity ensures that our production time is at least 7 days faster than other suppliers, and our professional transportation team ensures faster transit times.
