

EVA Laminated Glass Factory, Design EVA Laminated Glass Partition Wall Supplier

EVA film and steel mesh or mesh laminated glass, used to make patterns and material rich decorative glass. The [EVA film laminated glass produced](#) by Kunxing Glass Co., Ltd. is a kind of glass with excellent decorative properties. Wires and cloth can be sandwiched in the film layer to make decorative design glass with rich patterns, patterns and materials. It is mainly used for indoor partitions, shower rooms, etc., and is generally used for decoration.

Advantages of EVA laminated glass

1. High temperature resistance and sound insulation.
2. High safety, when the glass is broken, the glass will not fall and injure the human body.
3. Good adhesion: glass cloth, metal and textile industry, PET, PVC film.

[EVA laminated glass factory applications](#)
