

## **Factory price tempered tinted laminated glass, toughened laminated glass with color pvb film**

Color laminated glass is made of two or more sheets of glass together with a translucent colored plastic interlayer. Color laminated glass is similar to [clear laminated glass](#) but with the addition of a coloured (PVB) interlayer.

### **Characteristic**

- 1)Beauty sense: Color/tinted laminated glass with pvb interlayer will beautify the buildings and seen perfect which meet the demand of architects.
- 2)Excellent Safety:when it get broken, the PVB interlayer bonds the broken fragments together, keeping the glass intact.
- 3)UVR Resistance:The PVB interlayer can filter out UV rays, so laminated glass can protect indoor furniture, curtains, exhibits and other objects from fading.
- 4)Sound insulation: heat insulation and moisture protection.
- 5)Highly durable:so it can effectively avoid hurricane for storefronts, curtain walls and windows.

## Application

1. Windows, Doors, Skylights and Canopies (safer and stronger, create elegant new designs and framing systems)
2. Facades and Curtain Walls (stiffness, clarity, and impact toughness in high-performance, building facades and curtain walls)
3. [Glass Railings](#), Balustrades, Pool fence and Partitions (keep people in safe places, preventing injuries related to sudden glass failure)
4. [Glass Flooring](#) and Stairs (offer an extra level of deflection strength and structural integrity)
5. Glass Storefronts and Retail Displays (seen clearly, stay safely secured)

## Colored PVB Film
