

Glass factory selling double-layer insulating glass door and roofing plate unit supplier

[Double-glazed glass](#) is becoming more popular among residential and commercial property owners, who are looking for more energy-efficient solutions for homes and businesses. We use high-quality IGU production lines to provide high-quality double-layer insulating glass, ensuring high quality with China's best quality float glass, the best sealant, gasket, desiccant, double seal for each unit. Our insulating glass products include: laminated insulating glass, Low-E insulating glass unit, transparent insulating glass, colored reflective insulating glass, tempered insulating glass, and so on.

KXG IGU units are typically composed of two or more glass sheets separated by aluminum partitions and sealed together at the edges. Suitable for buildings and houses that require effective air conditioning control. Reduce the increase or decrease in heat. This product creates a more comfortable indoor environment, avoids extreme temperatures and significantly reduces heating and air conditioning costs. Winter makes the family warm and cool in summer. Doors and windows are more energy efficient and can also reduce the spread of noise.

Characteristic

Insulation: energy saving and environmentally friendly production.

Soundproofing to optimize the building experience.

Wonderful performance: visible light transmission.

Stable performance: in thermal processing. Easy to further process for tempering: hot bending or insulation.

Stable mechanical properties of solid coatings: high abrasion resistance and scratch resistance.

Application

- Exterior use of glass windows, [glass doors](#), skylight glass, roof glass, curtain wall glass, etc. Or indoor for glass partition walls, sliding doors, window, etc.
