8mm Etched Acid Glass

8mm Etched Acid Glass is a type of glass that is etched with acid. It is used for various applications such as signage, displays, and architectural glass. The etching process creates a textured surface that is resistant to scratches and provides a unique aesthetic. The glass is available in various sizes and thicknesses, and can be customized to meet specific requirements. The etching process is performed at a temperature of 700 °C, which creates a permanent and durable finish. The etched surface is highly resistant to environmental factors and is suitable for both indoor and outdoor use.

Features

1. Thickness: 8mm
2. Size: Standard size: 3300 * 4800mm, Custom size: 300 * 300 mm
3. Color: Clear, Frosted, Tinted, Etched, Various colors
4. Edge: Beveled, Polished, Beveled, Various finishes
5. Holes: Various hole patterns and sizes available
6. Cutout: Custom cutouts and shapes available
7. Applications: Signage, Displays, Architectural, Various uses
